ABOUT ME

Second-year computer engineering student with a passion for creating digital experiences through websites and games. Demonstrated problem-solving skills in real-world applications and a commitment to continuous learning. Actively participates in hackathons to enhance technical abilities and collaborate with peers.

PROJECTS

2D & 3D Games:
Developed simple interactive games using web and Unity basics.

Hackathon Prototype:
Selected in the internal college hackathon. Built a smart campus navigation app with a team.

Personal Portfolio Website:
Built using HTML, CSS, and JS to showcase skills and projects.

To-Do List App:
A lightweight task app using JavaScript for daily task tracking.

Calculator App:
Functional UI calculator made with clean design and JavaScript logic.
